AERIAL ADVENTURE PRODUCTS

Funlandia's Aerial Adventure line offers Rope Courses, Net Courses, and Adventure Towers, each crafted for thrilling experiences in adventure parks.

This lineup creates immersive adventures for diverse customer needs.

ROPE COURSES

Multi-level adventure courses offering a harnessed, intense challenge for thrill-seekers.

NET COURSES

provide safe, enclosed net structures, ideal for younger participants.

ADVENTURE TOWERS

combine multiple elements with both harnessed and enclosed courses, plus an optional viewing platform.

ROPE COURSES OVERVIEW

Our Rope Courses provide an immersive adventure, where participants navigate a series of elevated obstacles while securely harnessed. This attraction features various challenges like rolling logs, climbing net, and bridges, designed to test balance, coordination, and courage. The open-air structure enhances the thrill, as players traverse high above the ground without the protection of surrounding railings.

Compared to Net Courses, Rope Courses deliver a more intense and adrenaline-pumping experience, requiring safety gear and more involved operational procedures, making them ideal for thrill-seekers in adventure parks.

NET COURSES OVERVIEW

Our Net Courses offer a unique and engaging adventure within fully enclosed environments made entirely of durable nets. Participants can explore and navigate through various interconnected net structures, such as tunnels, bridges, and climbing net, all while being completely surrounded by soft, flexible netting.

This design allows for a safe and fun experience, particularly suited for younger children and those seeking less intense challenges.

FULLY ENCLOSED

SUITABLE AGE GROUP

LOW OPERATIONAL COSTS

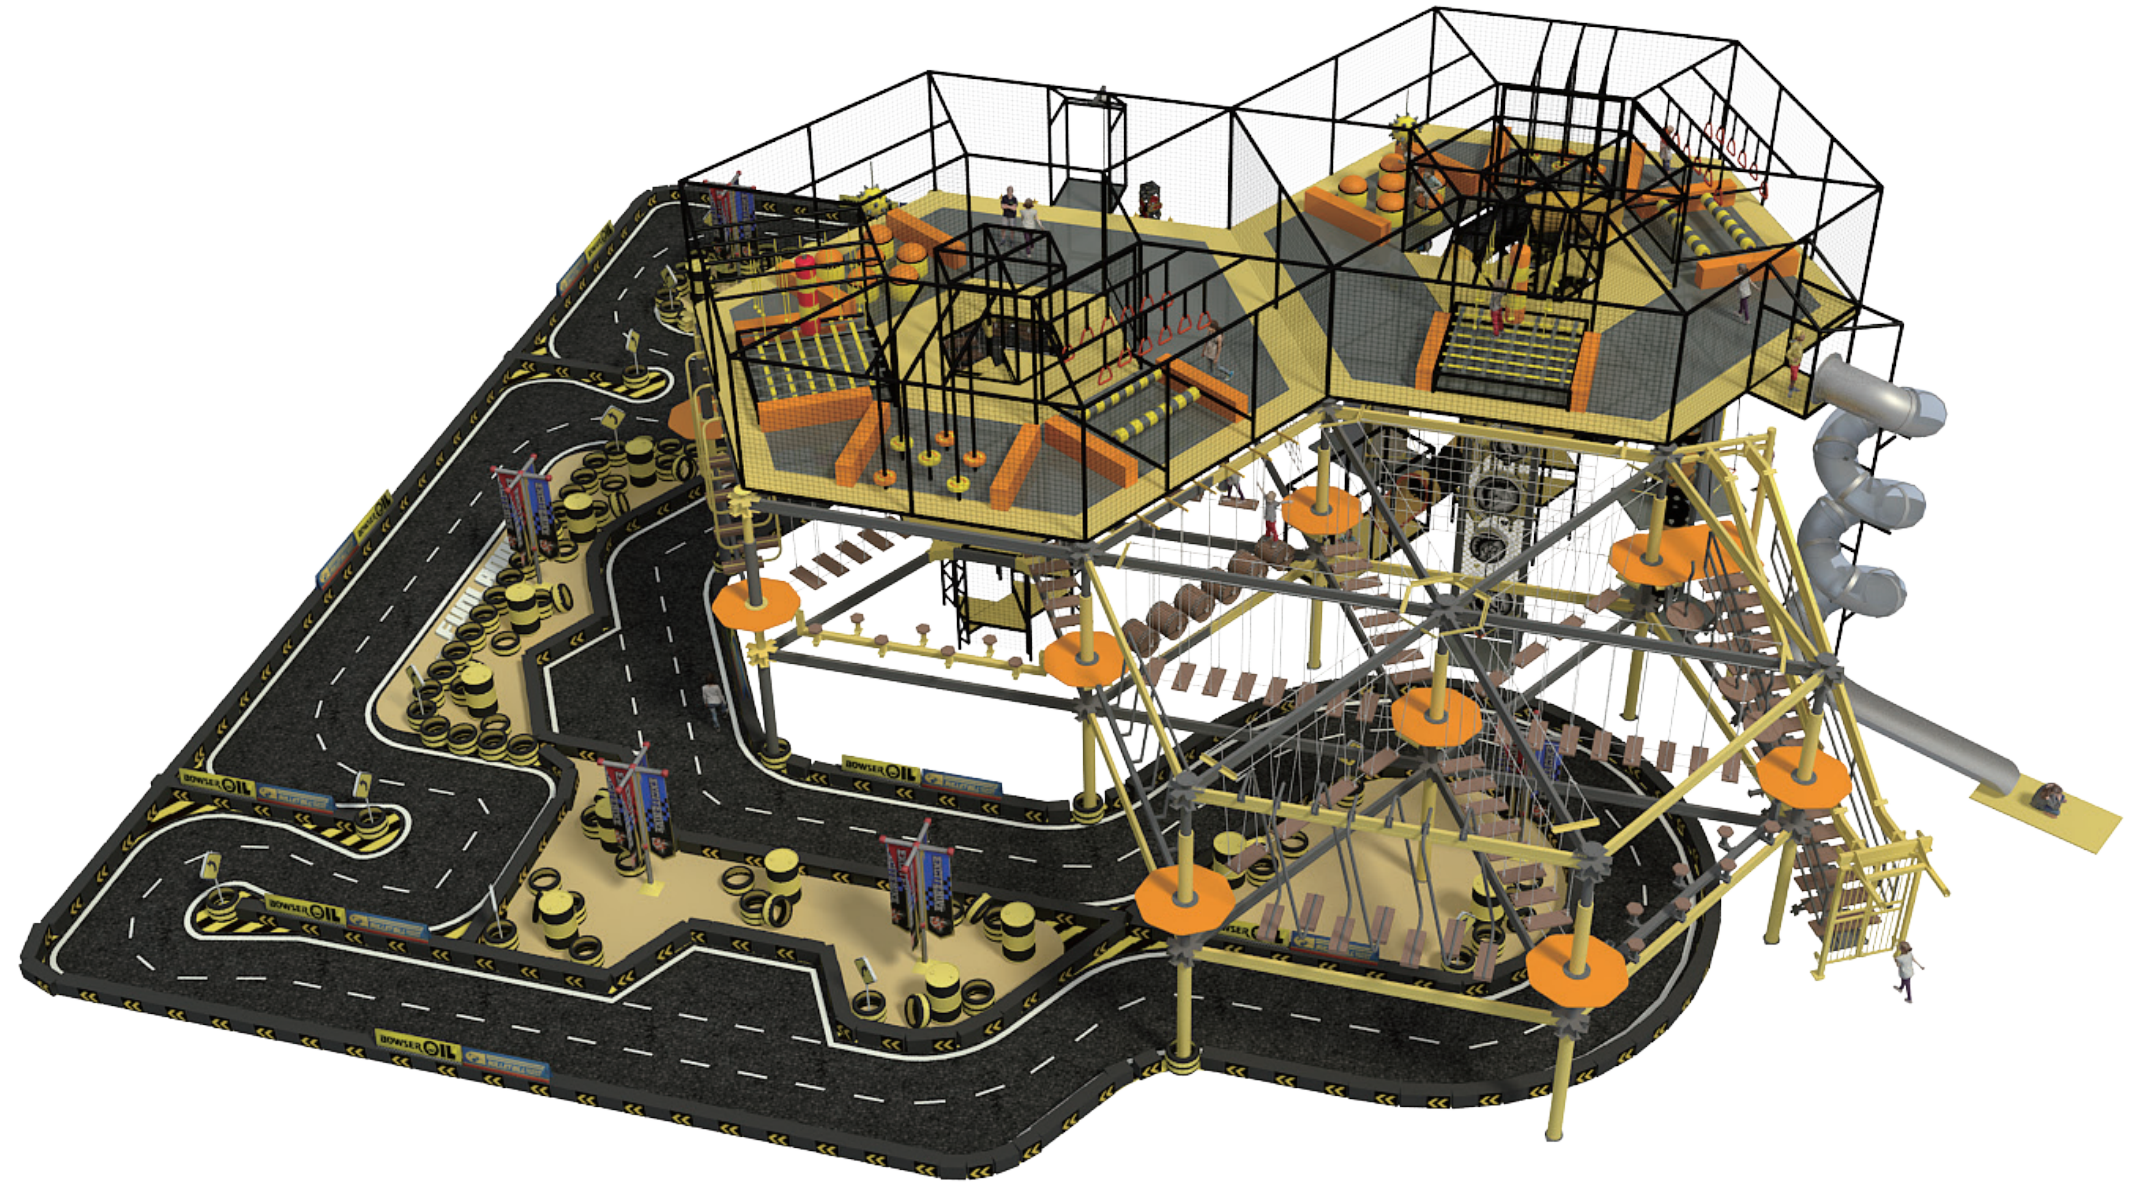

Net Courses are easier to manage, with lower costs and no need for extra safety gear, ideal for younger and more relaxed experiences.

ADVENTURE TOWER OVERVIEW

Our Adventure Tower is a visually striking attraction that combines Rope Courses, Net Courses, Climbing Walls, and Slides into a large, multifunctional play structure. This setup includes both enclosed pathways and harness-required routes, ensuring safety with clear movement lines. It also features a viewing platform at the top for sightseeing and leisure.

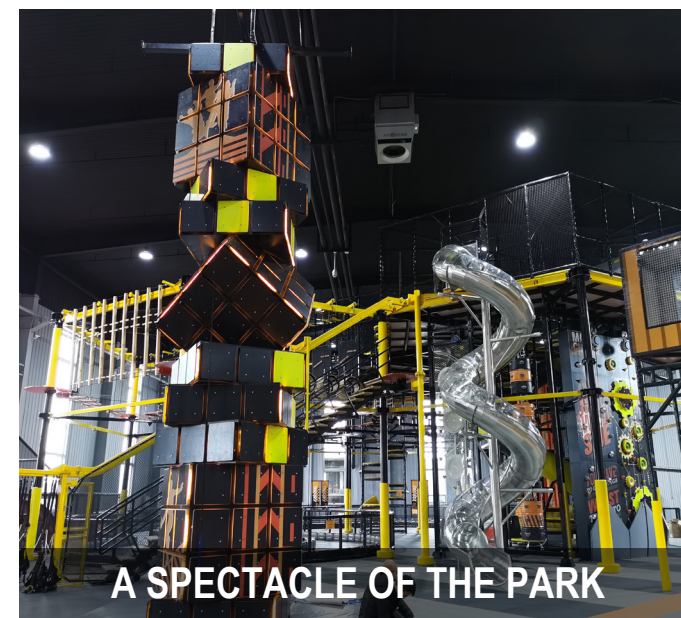

The design maximizes space while offering diverse activities, making it a standout feature in any indoor adventure park.

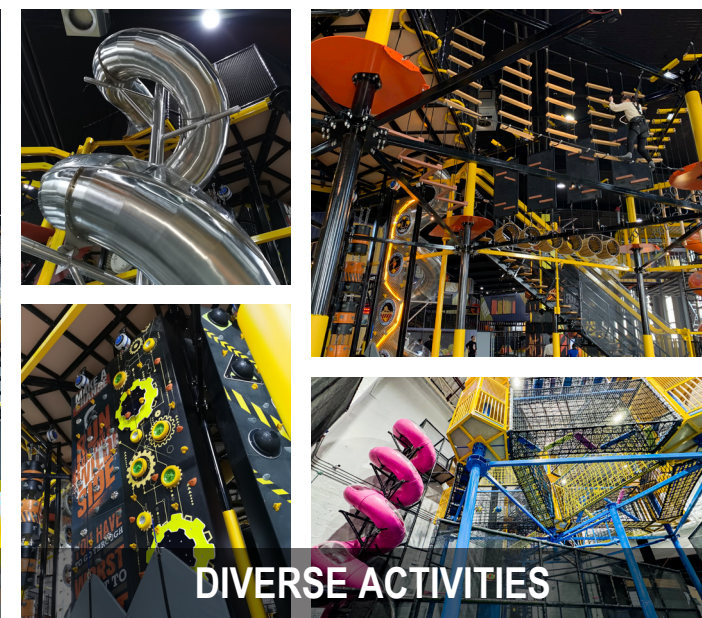

SEPARATE CIRCULATIONS: ENCLOSED OR HARNESSSED

VIEWING PLATFORM

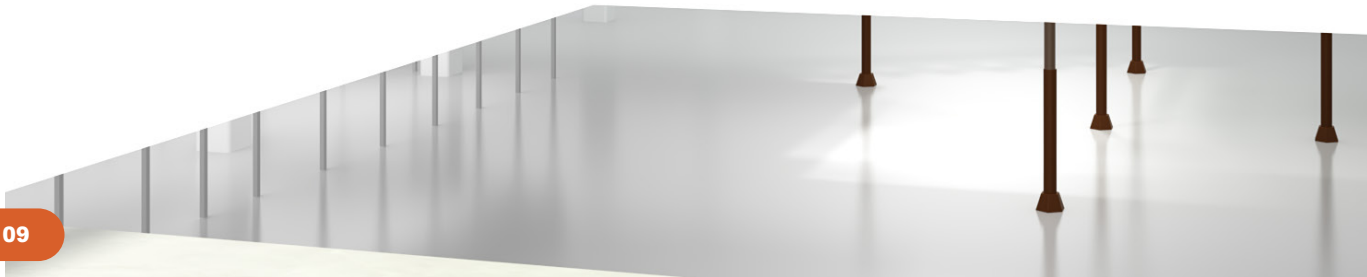

A SPECTACLE OF THE PARK

DIVERSE ACTIVITIES

CLIENT-CENTRIC SPACIAL AND FUNCTION DESIGN

Our design team optimizes your space while meeting specific operational needs and target audiences. Through close collaboration, we create adventure products that maximize operation efficiency, ensuring each design is both engaging and perfectly suited to your space.

CUSTOMIZED VISUAL AND THEME

We tailor visual styles and themes to match your park's unique identity and cultural influences. Whether reflecting local culture or specific themes, our designs bring your park's concept to life, ensuring a distinct and captivating visual appeal.
