X MONDRIAN

H-PARK  
FAMILY  
SPORTS  
CENTER

Amid a symphony of colors and lines, we've created a unique sports playground—Secrets of Mondrian Grids. Here, Mondrian's classic works come alive with red, yellow, and blue transforming into a dynamic sports adventure.

## This expansive 3000+ square meter family entertainment center

successfully launched in Shanghai in 2023. Located within a major shopping mall, it offers convenient access and ample parking, perfectly meeting families' one-stop fun needs.

# Experience Fun through Exercise

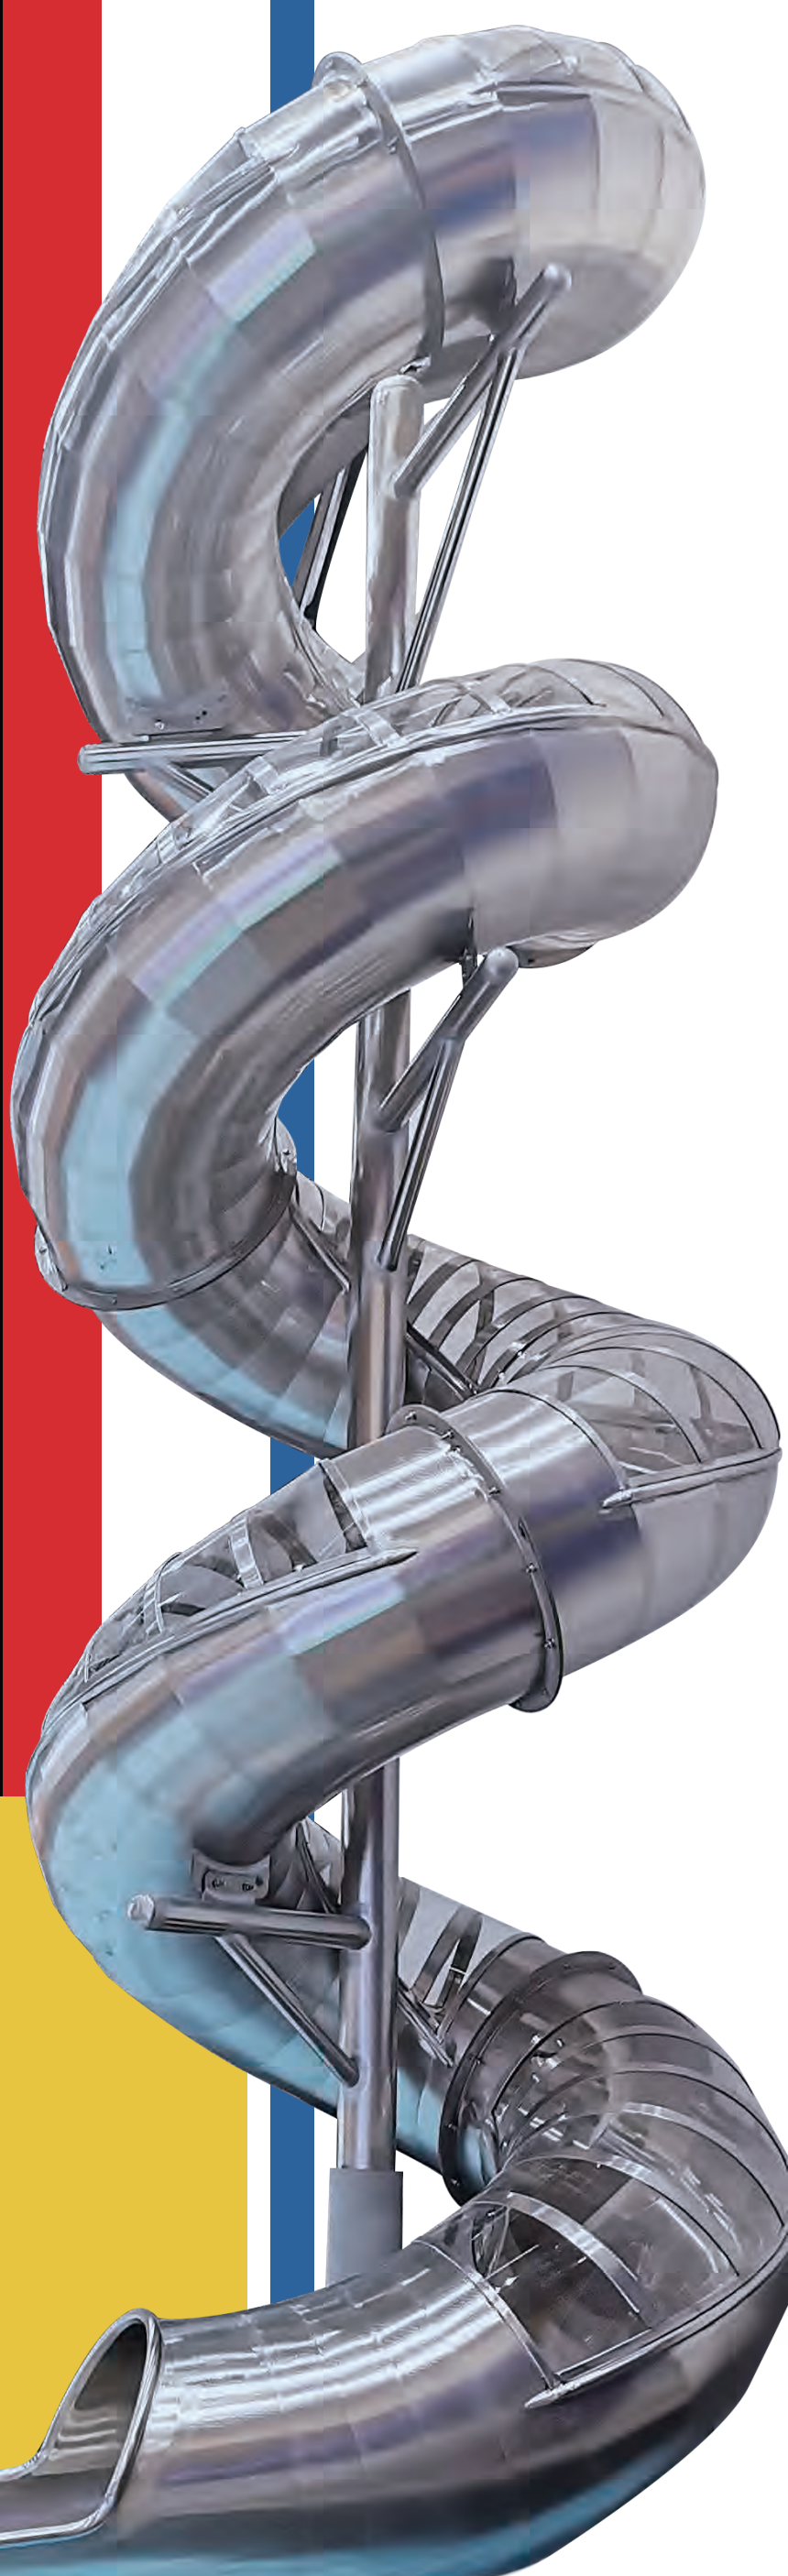

The entire park is divided into multiple zones to cater to children of different age groups, allowing kids to engage in physical activities while having fun.

### **Stainless Steel Spiral**

**Slide:** Connected to the honeycomb net courses, the ultra-high spiral slide lets children experience the thrills of gravitational acceleration. The sense of achievement is sky-high!

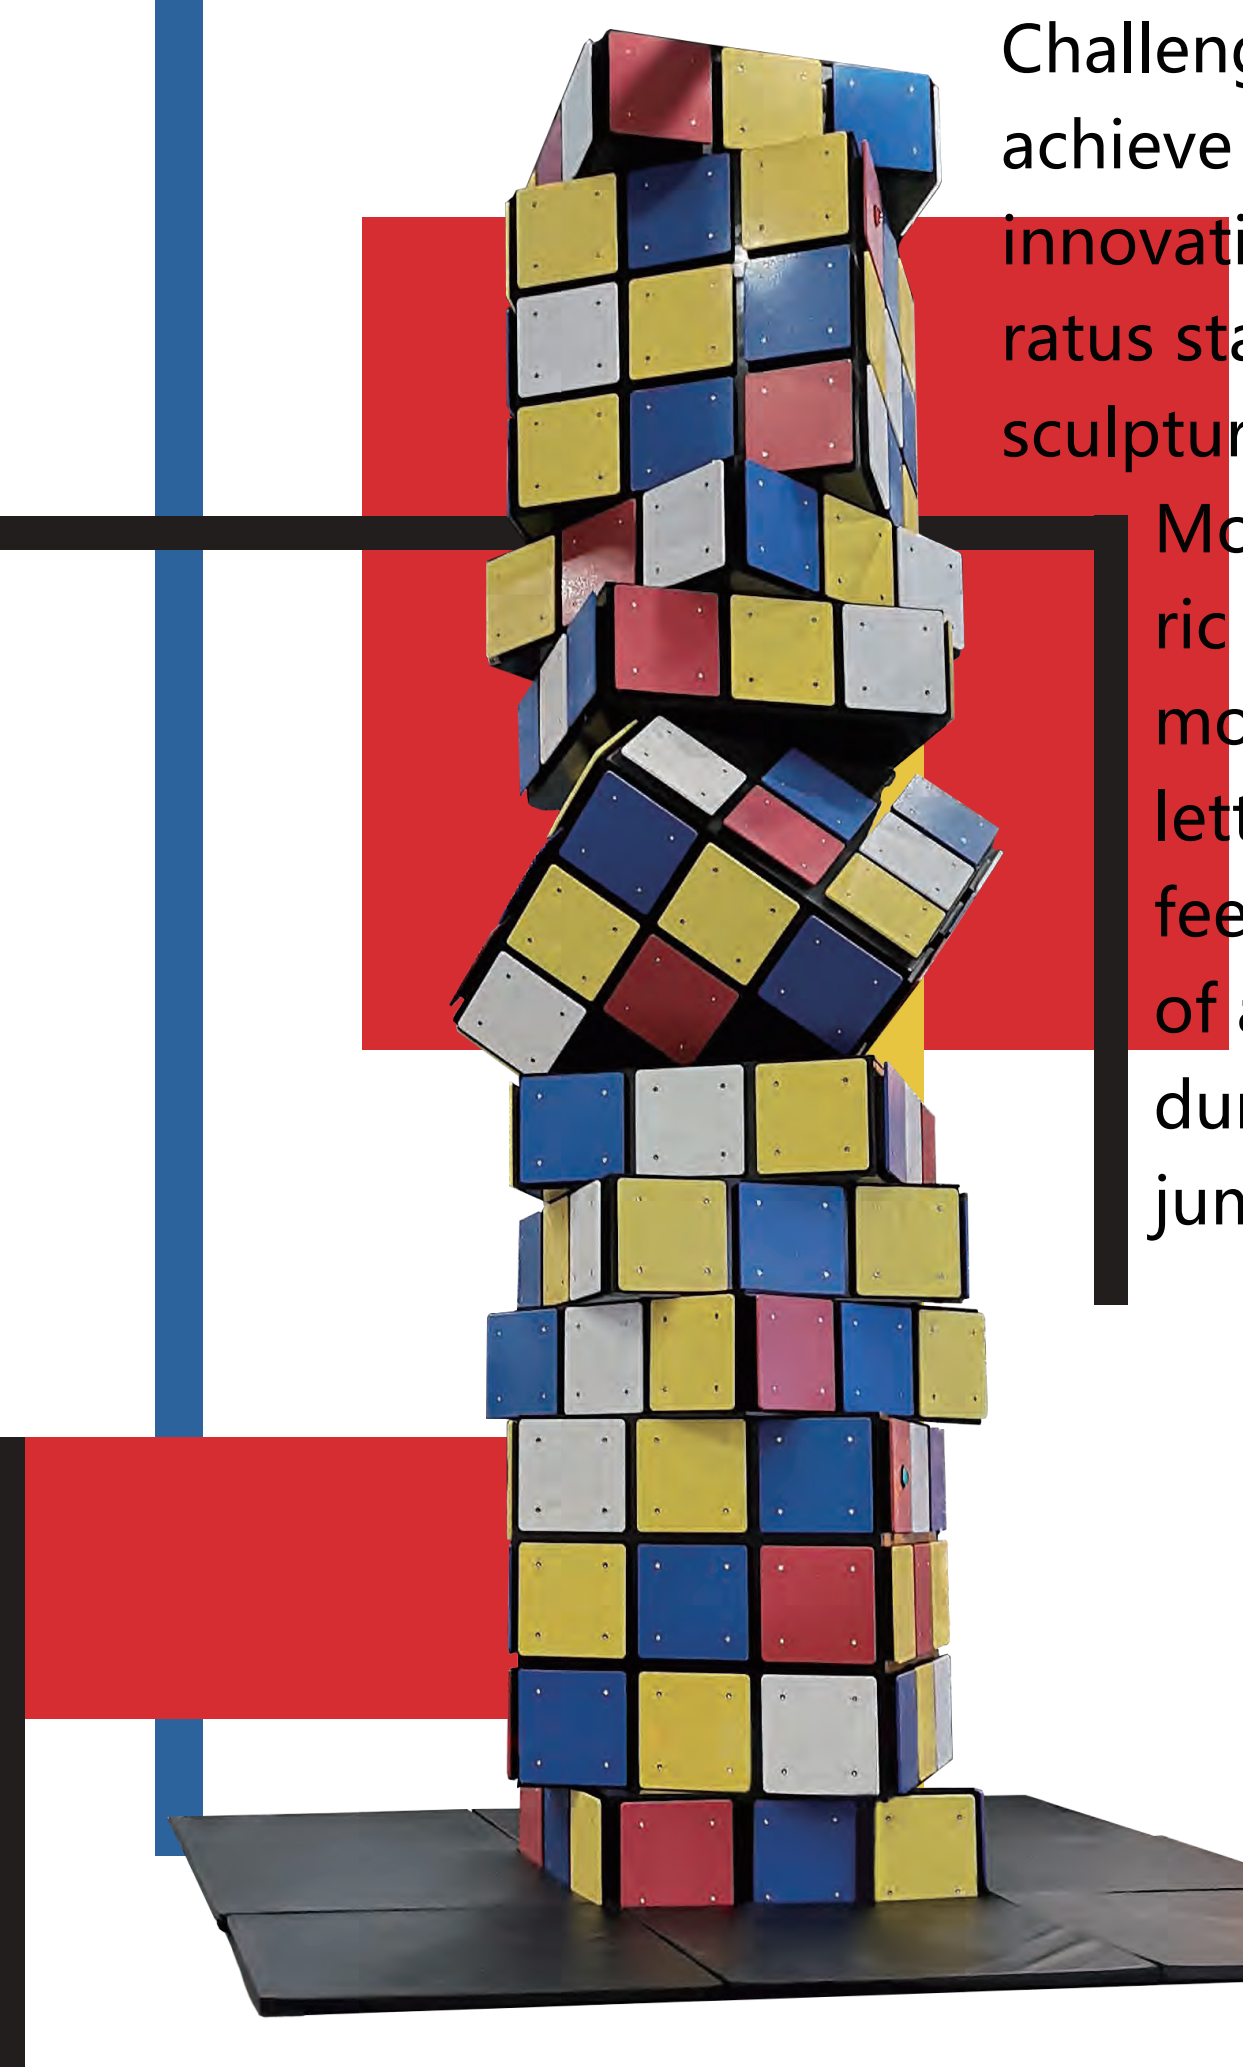

**Rope Courses:** Installed uniquely on the ceiling, the rope courses ensures safety while adding layers of challenge and thrill. It tests bravery and enhances coordination and balance.

Jump Grid Climbing Cube:  
Challenge gravity and  
achieve new heights! This  
innovative climbing appa-  
ratus stands like a static  
sculpture, combining

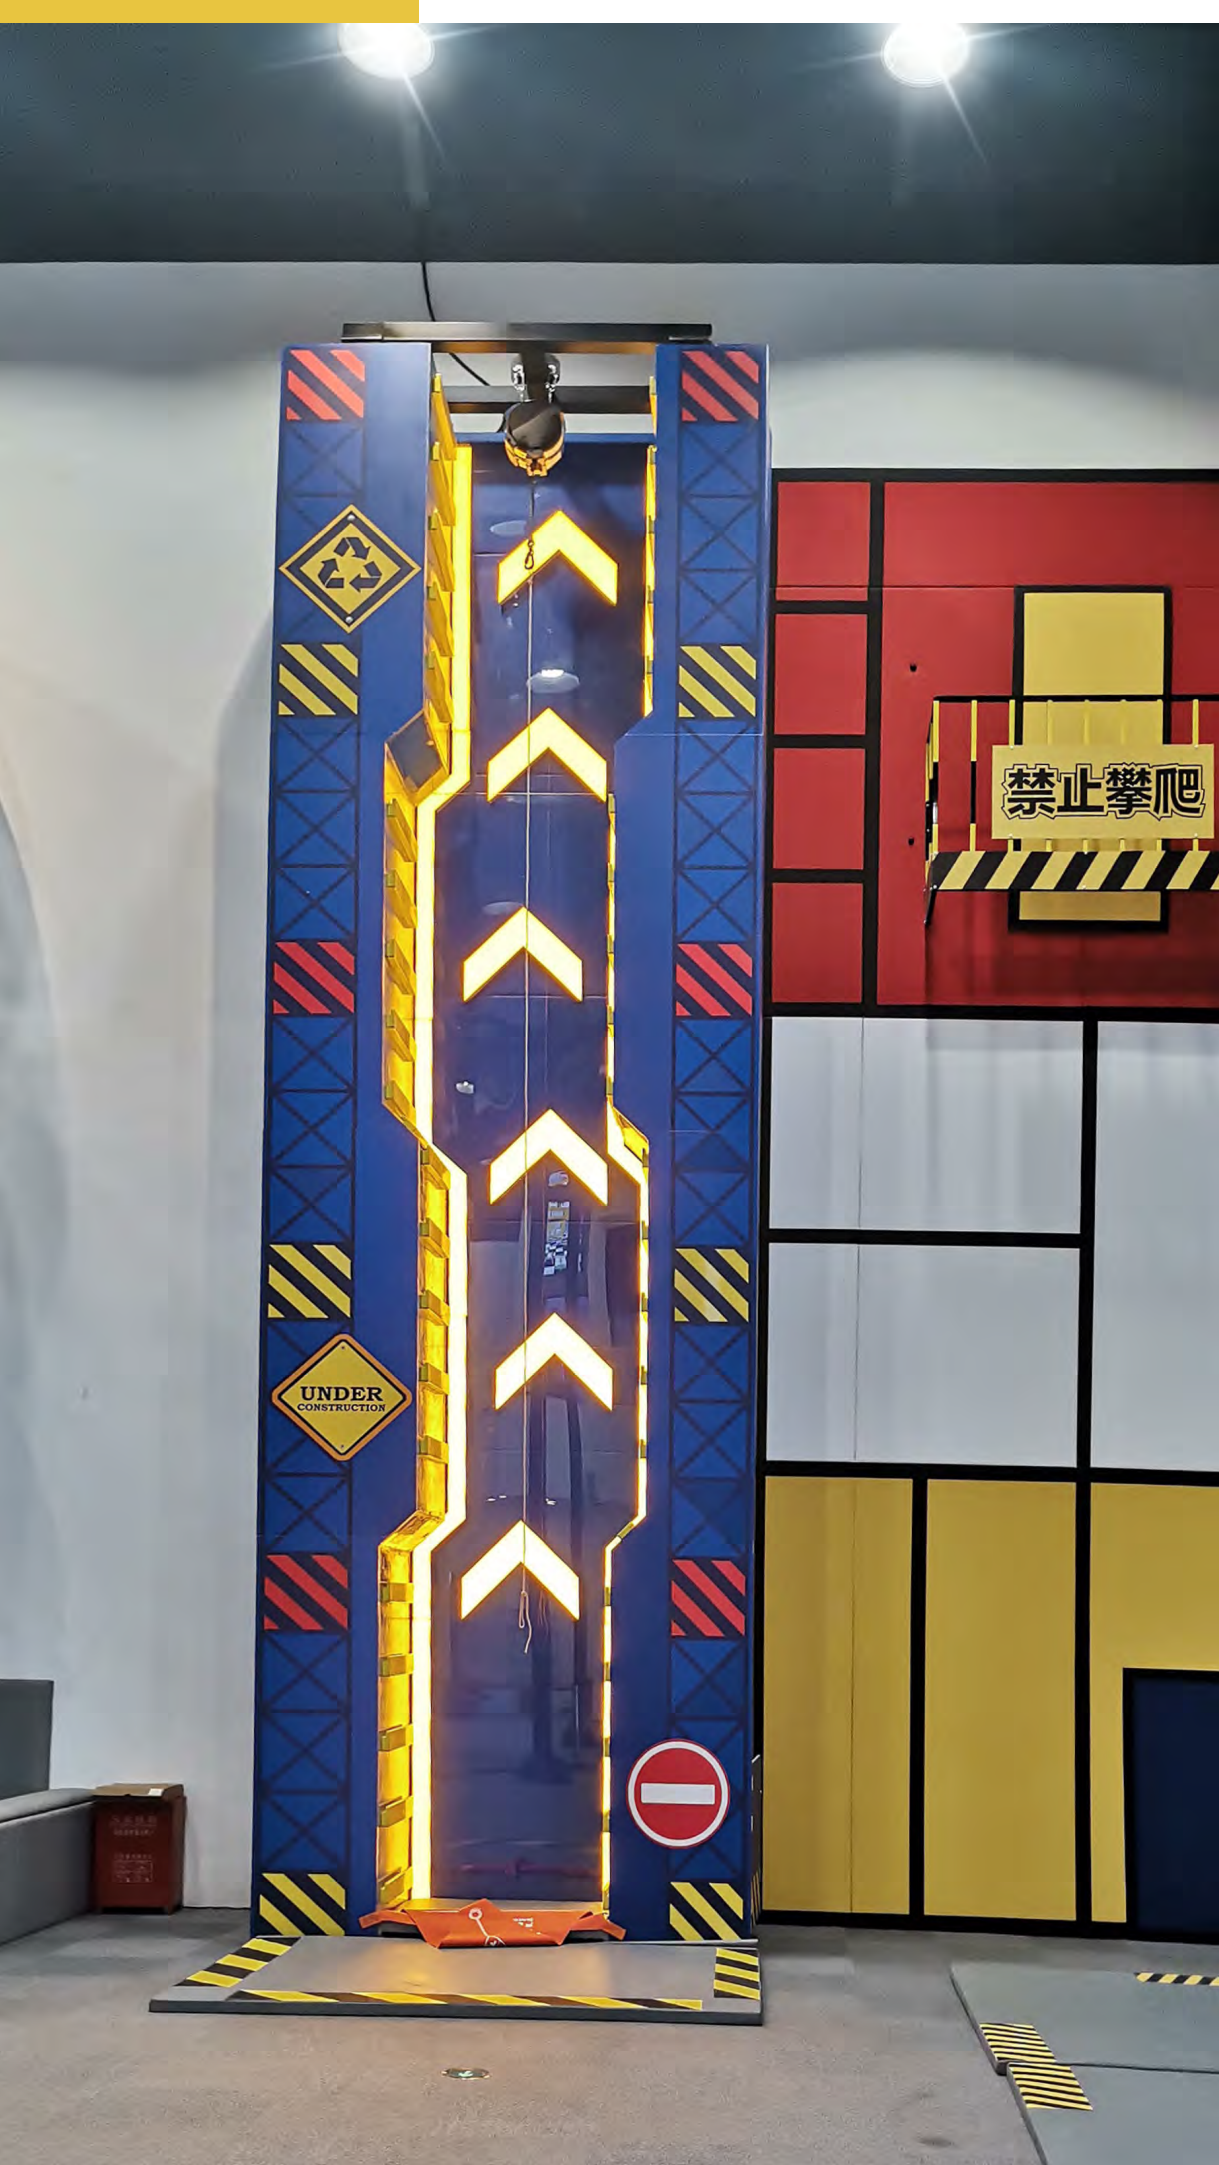

Mondrian's geomet-  
ric aesthetics with  
modern sports thrills,  
letting participants  
feel the dual release  
of art and physicality  
during climbing and  
jumping.

Additionally, the park  
features trampoline  
zones, climbing areas,  
and interactive zones,  
offering kids a variety  
of play options where  
they can sweat through  
exercise and rediscover  
childhood joy!

**Innovative Visual  
Experience**

The park's design uniquely embraces the Mondrian style, featuring the four-color grid pattern of black lines interspersed with red, yellow, blue, and white. It creates a fresh, vibrant, and dynamic ambience that is visually captivating and entertaining.

Distinctive lines create a feeling of blended grids and colors, making visitors feel as though they are in a whimsical grid world. Straight and horizontal lines evoke contrasting forces but achieve balance and unity through color and material.

# Safety Assurance and Customer Needs

**Ceiling installation technology** maximizes space in high-altitude projects by reducing the need for columns and adhering to weight-bearing standards. This ensures safety, enhances ground space utilization, and makes the venue more streamlined and attractive.

We integrated the high-altitude rope courses' entry/exit with the park's second-level entry/exit to optimize the touring route and enhance visitor experience. This boosts equipment efficiency and improves overall functionality and convenience.

Funlandia is committed to "creating meaningful play for families," innovating to craft satisfying family parks. H-Park Family Sports Center offers families a magical blend of exercise and entertainment for memorable moments. We will continue to deliver creative surprises and diverse entertainment options!
